Van Grenquist, 5/26/09

Employee Of The Month

Dennis Silverio

Student Of The Month

This month's recipient for Student Of The Month is Adrien Malosse. Adrien is currently enrolled in the Aviation Science Program at the North Shore Community College. He achieved his first solo flight last month. His instructor is Andrew Struppa. Congratulations Adrien!

Customer Database

****IMPORTANT: TAKE NOTE****

To greatly improve the efficiency, safety, and customer service at our flight school,

Beverly Flight Center has switched to an electronic customer database. On your first visit in this month we kindly ask your cooperation in verifying that we have your most up-to-date information. This will only take a few minutes. We ask that you please bring in the following documents:

- 1.) Valid Photo Identification
- 2.) Logbook
- 3.) Pilot Certificate
- 4.) Medical Certificate

With this system in place, we can very quickly verify that all pilots meet their currency requirements to fly before an aircraft is dispatched to them. Once we receive your information we ask that you inform us of any changes. Thank you for your cooperation.

Specials Of The Month

Multi-Engine flying! We have designed three packages designed to introduce you to the world of multi-engine flying, or to increase the experience level of those already rated.

Multi-Engine Rating
10 Hours Dual for \$2799

Multi-Engine Time Building
10 Hours Dual for \$2475

Multi Engine Time Building
10 Hours Solo for \$2125

Give us a call or come in for specific details.

Bees!

On May 31st 8119H was overtaken by a large swarm of honey bees while parked on the ramp. The swarm landed on the top of the wing, later taking refuge in the shade under the wing to avoid the heat. Alan Wilkins, a beekeeper in Middleton, was summoned to dispose of the swarm. He used a special vacuum connected to a collection box to safely suck up the bees. Customers stood by impressed at seemingly dangerous work conducted by Alan. The event is the most bizarre occurrence that Arne has seen in quite a long time.

Flying Again...

The Citabria and 2159H are flying again, both having received new engines. They are currently in the engine break-in period, which means that they are to be used only for cross-country flights and must use only mineral oil.
