PRIVATE PILOT: Begins on Tuesday June 30th @ 6:30 p.m. The instructor will be Ann Marie Murphy.

INSTRUMENT PILOT: Begins on Monday May 18th @ 6:00 p.m. The instructor will be Michael Bratt.

Recent Accomplishments

Beverly Flight Center, Inc. would like to congratulate the following individuals on their accomplishments during the month of April:

FIRST SOLO

Nick Campusano, 4/14/09

PRIVATE

Donald Masella, 4/4/09

Steve McDonald, 4/5/09

INSTRUMENT

Dan Smith, 4/4/09

Employee Of The Month

Mike Bratt

Student Of The Month

This month's recipient for Student Of The Month is Nick Campusano. Nick is currently enrolled in the Aviation Science Program at the North Shore Community College. He achieved his first solo flight last month. His instructor is Mike Bratt. Congratulations Nick!

Customer Database

****IMPORTANT: TAKE NOTE****

To greatly improve the efficiency, safety, and customer service at our flight school, this month Beverly Flight Center will be switching to an electronic customer database. On your first visit in this month we kindly ask your cooperation in verifying that we have your most up-to-date information. This will only take a few minutes. We ask that you please bring in the following documents:

- 1.) Valid Photo Identification
- 2.) Logbook
- 3.) Pilot Certificate
- 4.) Medical Certificate

With this system in place, we can very quickly verify that all pilots meet their currency requirements to fly before an aircraft is dispatched to them. Once we receive your information we ask that you inform us of any changes. Thank you for your cooperation.

Specials Of The Month

Multi-Engine flying! We have designed three packages designed to introduce you to the world of multi-engine flying, or to increase the experience level of those already rated.

Multi-Engine Rating
10 Hours Dual for \$2799

Multi-Engine Time Building
10 Hours Dual for \$2475

Multi Engine Time Building
10 Hours Solo for \$2125

Give us a call or come in for specific details.

Propeller Locks & Pitot Tube Covers

Now that the warm weather has arrived, we will be resuming the use of propeller locks and pitot tube covers for all aircraft. Be careful to verify that both are removed prior to flight, and we request that you please replace the pitot tube cover after every flight.

Practice Area Procedures

We are already seeing an increase of flying with the nice weather. To help maximize safety we request that all pilots participate in our Practice Area Procedures. Eastbound flights should fly at 1500 or 2500 feet MSL when outside of the traffic pattern area, while Westbound flights should fly at 2000 feet MSL. Also, please monitor and utilize the air-to-air frequency of 122.75 when outside of the Beverly Class D airspace. Announce your callsign, position, and altitude when beginning maneuvers. In this way, pilots have enhanced situational awareness of other aircraft around them. Please see our website or speak with our instructors and dispatchers for more information. We appreciate your cooperation.
